

# Safeguard your company's private information.

First, choose the security level you need.

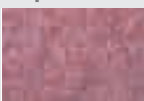

GBC shredders offer a choice of shredding styles — from our newest super micro-cut to more traditional micro-cut, cross-cut and strip-cut options. The cut you choose will depend on three factors: security level, shred speed and volume of shred waste.

Next, consider the types of documents or media you will be shredding.

GBC ShredMaster® offers you practical options for large size documents and CD/DVD destruction. Look for shredders with a throat size of at least 310mm if you shred very large documents. Shredders designed for credit cards or CDs/DVDs are indicated by these icons:

Regulatory standards, including the DPA (Data Protection Act passed in 1998 in the UK), demand companies destroy hard copies of information about individuals that could put that person at risk should the information become public knowledge.

	Security	Shred Speed	Shred Waste	Location Area and Volume Use			
				Department/low volume	Department/high volume Multi-department/low volume	Multi-department/high volume	Multi-department/super high volume
<b>Strip-Cut</b> 	Medium S2	Fastest		<b>4500S</b>  <ul style="list-style-type: none"> <li>• 26 sheet capacity (70gsm)</li> <li>• 140 litre bin</li> <li>• 310mm throat</li> </ul> 	<b>5500S</b>  <ul style="list-style-type: none"> <li>• 24 sheet capacity (70gsm)</li> <li>• 160 litre bin</li> <li>• 380mm throat</li> </ul> 	<b>6500S</b>  <ul style="list-style-type: none"> <li>• 41 sheet capacity (70gsm)</li> <li>• 200 litre bin</li> <li>• 400mm throat</li> </ul> 	<b>7500S</b>  <ul style="list-style-type: none"> <li>• 55 sheet capacity (70gsm)</li> <li>• 225 litre bin</li> <li>• 405mm throat</li> </ul>
